Subject: Solar Docket: 2005-385-E

PSC SC
MAIL / DMS

Trees are everywhere in SC but so are unobstructed rooftops. Shopping centers, parking garages, apartment complexes and houses just start the list. All are candidates for putting solar to work if conditions in the state were more receptive to solar energy.

Capping Furman's solar expansion seems like an unreasonable regulation as does the extremely low threshold allowed for household solar.

Please give the solar industry a better welcome as you implement the PSC mission for open and fair utility service. I'll be looking forward to the forum earlier in 2014 after the Energy Advisory Committee report is in.
